1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Byrne shows a system for detecting an imbalance in operating voltage between two batteries while Lex discloses restoring electrochemical activity to a battery electrode by reversing the direction of normal cycling current through the battery.

2. The following is an examiner's statement of reasons for allowance: none of the prior art of record teach a system that identifies an electrical short in a flowing electrolyte battery including means for detecting a direction of current flow through the battery, wherein one direction is a proper flow of current and the opposite direction is indicative of an electrical short in the battery and further including means for ceasing current flow through the battery when an opposite direction of current flow is detected.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
